DETAILED ACTION

1. Note that this application has been included in **Art Unit 2654**, and that this AU number should be used in all future correspondence.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-41 and 60-100, drawn to Speech Signal Processing:
Recognition; Speech to image, classified in class 704, subclass 235.
 - II. Claims 42-59, drawn to Data Processing: Financial, Business Practice, Management, or Cost/Price Determination, classified in class 705, appropriate subclasses for business methods and particularly subclasses 26 and 27 for electronic shopping.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the *business model for a business in which*

Art Unit: 2654

consumers call into a service using an ordinary telephone and make requests in plain speech for information and positive referrals on goods and/or services, and the service provides responses to the request in plain speech in real-time over the same telephone of claim 42 does not require the *voice recognition engine, data base, search engine, speech engine and speech server* of claims 5 and 60. The subcombination has separate utility such as an automated general information kiosk.

4. A telephone call was made to Raymond Michael Ananian at (650)494-8700 ext 2595 on 04 October 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
